

1-to-1 Learning with Laptop School Leader Survey

Directions: Network strength is often rated by the number of bars in the status icon.  How many bars would you rate the strength of each of these aspects of our learning with laptop program (circle one of the icons)? You might want to skim the entire survey before starting to respond.

There are no right or wrong answers. This is simply a tool to help us gather information on how to improve our learning with laptop program.
